ABOUT ALCOTECH FACTORY

AlcoTech is one of citadels of the aluminum composite panels industry in the middle east, which targets the global markets in terms of quality and development.

AlcoTech relies on the use of the latest production lines in its factories, which have a production capacity of more than 3,600,000 m² / year, in addition to a professional team with great experience in the field of manufacturing ACP with different specifications, colors and multiple effects that suit all customer requirements in the local and international markets.

OUR MISSION & VISION

OUR MISSION

AlcoTech aims to localize the production of (ACP) and their derivatives, as well as related industries, while continuously working on their development and finding various uses for these products.

AlcoTech is opening many factories in promising African countries for this industry and its components, in addition to forming a giant base of agents and successful partners, seeking new success stories based on the principle of mutual gain.

AlcoTech contributes to supporting architects and designers in spreading the spirit of modernity and development in urban expansion due to the distinctive features of these products, such as color diversity and effects, ease of use, and lower prices compared to their counterparts made of other materials over their lifespan.

OUR VISION

AlcoTech carries an exceptional vision for localizing the (ACP) industry in Africa and becoming a leader in this field, especially in light of the enormous urbanization trends in the region.

AlcoTech also participates in reconstruction and urban development projects adopted by the Arab region by providing high-quality products that meet international standards at competitive prices worthy of attention.

AlcoTech has adopted a clear vision of relying on supporting the use of environmentally friendly raw materials as part of the global plan to preserve the climate. Therefore, we chose the slogan "Make Your World Shiny" believing in the necessity of keeping up with development.

MAKE
THE WORLD SHINY

OUR PRODUCT LINE

ACP products, or aluminum composite panels, are considered one of the most important products used in architectural facades due to their strong ability to withstand various weather conditions, versatility in usage, lightweight nature, and a lifespan that exceeds 20 years.

They also have excellent insulation properties that isolate the interior of the building from external factors. Additionally, they harmonize well with other materials used in architectural facades, such as glass and other aluminum sections.

AlcoTech adopts a flexible strategy to meet its customers' demands by providing smart solutions for producing any size or specification to help them save costs and avoid unnecessary waste.

BUILDING CLADDING

OUR PRODUCT LINE

Architectural designers rely on (ACP) as a primary material for interior decorations in global and local projects due to their numerous properties and ability to add modernity and attractiveness to any usage.

We see them as the main element in the decorations of international airports, commercial malls, hospitals, and even private homes. Interior aluminum panels challenge all other decorative materials as they are the least expensive, longest-lasting, and have the best impact with a wide range of over 250 colors and effects in all shades and shapes.

INTERIOR CLADDING

OUR PRODUCT LINE

KITCHEN CLADDING

The best materials used in modern kitchens are (ACP) due to their variety of colors and unlimited effects, as well as their competitive prices compared to other materials. In addition, they are easy to use for kitchen manufacturers.

(ACP) used in kitchens have been able to attract the attention of customers who are looking for beauty and functionality. They have been able to withstand various uses that characterize this area of the home, such as constant exposure to water, heat, and different factors, for a long time while maintaining all their properties without changing.

VARIETY OF TYPES

AlcoTech has been able to make the impossible come true by finding strong, attractive, and competitive solutions for all of its products, including ACP for kitchens, interior decoration, and exterior facades.

You will find that they produce panels with economical prices and specifications that are accepted by many Arab and African markets, as well as specifications used in giant projects that rely on special aluminum and internal polyethylene specifications, as well as the type of paint with a warranty period reaching more than 20 years.

Not only that, but Alcotech's panels have gained a widespread reputation and trust for their fire-resistant products according to internationally recognized certificates and standards from leading organizations specializing in specifications and quality to compete with their products in the largest European markets.

VARIETY OF COLORS

Life is full of multiple colors, and the Alcotech slogan "Make your world shiny" has been proven by using (ACP) with a wide range of colors and multiple effects. You will find that primary colors harmonize with nature and its wonderful colors, while shiny colors add modernity and attractiveness to buildings both inside and outside.

Wooden, marble, and stone panels also appear as expressive artistic pieces that reflect a stunning harmony with nature. Not only that, but also golden and silver effects appear in their natural and attractive colors, as well as the "brushed" aluminum effects that give rich touches with a modern spirit. These panels play together in a beautiful symphony that cannot be imitated by any other material.

MODERNITY AS IT SHOULD BE

AlcoTech has played a significant role in the architectural revolution since its creation by providing elegant and diverse solutions to architects worldwide through its ACP.

These panels have been known for their quality, color durability, and effects throughout different eras. The ACP have dominated the thoughts of top architects worldwide as they are unparalleled in their function compared to other products.

Additionally, they can harmonize with all other materials used in buildings. Therefore, the most famous and important buildings in the world are covered with these fantastic panels with their different effects, specifications, and colors.

INTERNATIONAL & LOCAL REACH

As the world is a small village, Alcotech carries on its shoulders the necessity of transferring its experiences and products across different borders.

This is because it believes in the continuous support and development of global architecture. Alcotech chose to establish its first factories in Egypt due to its excellent geographical location in the markets targeted by Arab and African countries.

AlcoTech aims to intensify export efforts to African countries by consolidating this industry on Egyptian soil as a first step, followed by expansion into Africa as a second step.

It will benefit from all international agreements that encourage foreign trade partnerships based on mutual gain. Moreover, it has the ability to deliver products easily by land or sea to all parts of the world.

ALCOTECH FACTORY

AlcoTech has chosen a prime location in the industrial area of Beni Suef on the international highway (Cairo-Cape Town) and has established it as an industrial center amidst a constellation of major industrial giants.

The facility accommodates four production lines as a first stage, in addition to a large storage area for raw materials and finished products.

AlcoTech relies on a professional team of experienced experts in the industry, followed by a team of skilled Egyptian engineers and technicians, given the newness of this industry.

It is also supported by an Egyptian team with high expertise in many Egyptian brands.

**IT'S ALL ABOUT
TECHNOLOGY**

OUR PRODUCT LINE

AlcoTech uses the latest and most advanced global production lines, as well as all modern technologies and means, to assist the production process and ultimately produce high-quality products.

Through its professional team, AlcoTech has been able to reach the best raw materials, which have helped it produce high quality at lower costs.

It also relies on daily analysis of its production in its laboratories, striving for quality and constant development to maintain its deserved position and gain the trust of its customers while attracting new ones from targeted markets. AlcoTech does more to maintain this high position that earns it new customers day after day.

EGYPTIAN MADE
GLOBAL STANDARDS

AFFRICA **& MIDDLE EAST**

Alcotech has a large network of local and international clients, with its licensed facilities that deliver premium quality architectural facades.

Alcotech helps its clients achieve their goals with modern designs and state-of-the-art technology in the areas of exterior and interior works.

Alcotech ACP is a composite comprising a skin of two aluminum sheets sandwiching a polyethylene / modified mineral core produced in a continuous and integrated co-extrusion process.
